CLIENT EDITION

01 · ABOUT PRIMEPIP

What is Primepip?

Primepip is a start-up investment platform, founded in 2025. A team of professional forex traders trades client capital, and the profit or loss is shared among investors in proportion to what each has invested.

Forex only

Client capital is traded in the foreign-exchange (currency) market. Nothing else.

Professional traders

Trading decisions are made by our team of forex traders.

Shared results

Profit and loss are divided among investors according to each person's investment.

Who is behind Primepip

A group of professional forex traders who manage client portfolios. We are a start-up with the aim of building a larger, established company.

Our aim for clients

We aim to generate 30%+ profit per year for clients. It may be higher or lower, and it is **never guaranteed**.

Our status, stated plainly

Primepip is an **early-stage start-up**. It is **not a registered company**, is **not authorised or regulated** by any financial authority, and does not represent any broker. We started with a selected circle of clients and are now opening to more investors. Please read the risk page before you invest.

02 · HOW IT WORKS

How your money works.

Five simple steps from your deposit to your daily results.

1 **You deposit**
Crypto sent to Primepip

2 **Funds credited**
After review, within 24 working hours

3 **You invest**
Your choice, $100 to $1,000 at launch

4 **Traders trade**
Our forex team trades the market

5 **Results shared**
Profit or loss added to your account

Risk control: only part of the capital is traded

- About 25% of total client investment is used in trades
- The rest is not placed in trades

Profit or loss from trading is shared among all investors in proportion to their investment.

How results reach your account

- Profit or loss is entered by the Primepip admin team, mostly **every trading day**
- It is divided among investors **by share of investment**
- Every entry appears in **Statements**, with a **notification**
- Your investment **stays active until you withdraw**; a loss does not close it

Example: how one day's result is shared

Net trading result
+$10
Simplified example

- Investor A has $100 (20% of $500) → **+$2**
- Investor B has $400 (80% of $500) → **+$8**

Good to know: deposits and investing are two separate steps. A deposit sits in your Available Wallet until you choose to invest it.

03 · YOUR ACCOUNT

Five balances. One clear picture.

Your dashboard shows five heads. Money always starts in your Wallet, and you decide how much to invest.

Primepip — ACCOUNT OVERVIEW · SAMPLE

1. Wallet	2. Total Invested	3. Secure Profit	4. PnL	5. Referral Earn
$100	$100	$15	$100	$25

Illustrative layout with sample numbers. Not a live client account.

Example: from Wallet to Total Invested

You add money
Wallet $200

→

You invest $100
You choose the amount

→

Result
Wallet $100 · Total Invested $100

NOT AFFECTED BY TRADING LOSSES

1. Wallet
Where every deposit lands first. Ready to invest or to withdraw.

3. Secure Profit
Profit that has been banked. Move it to your Wallet any time, with no transfer limit.

5. Referral Earn
Rewards from your referrals. Move them to your Wallet any time, with no transfer limit.

AT RISK

2. Total Invested
The amount you moved from Wallet into trading. In the example above, $100.

4. PnL
What your investment is worth now, after profits and losses. **This is the only part exposed to trading results.**

PnL can go down as well as up. See the next page for exactly how.

Every transaction creates an entry in **Statements** and a **notification**. Check the request itself to confirm its real status; a notification alone is not proof of payment.

04 · PROFIT AND LOSS

How profit and loss move.

A worked example with a $100 investment. Follow the blue line (your PnL) and the green line (your Secure Profit).

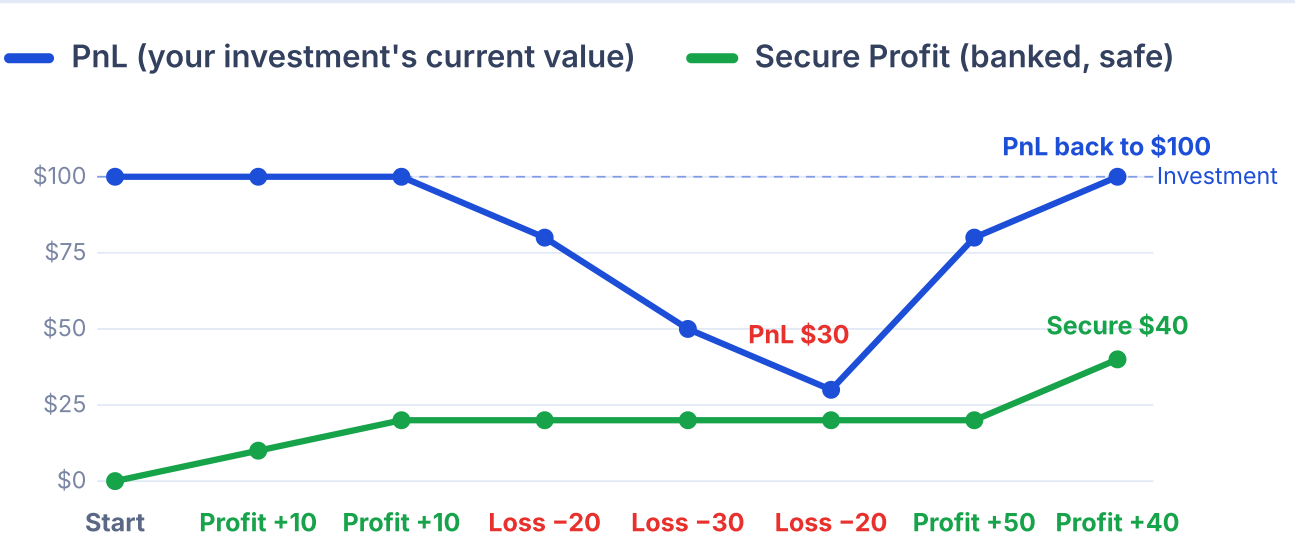

Illustration only, not real account data. Each step is one profit or loss entry, in dollars.

1 PnL equals your investment?
Any profit goes straight to Secure Profit. It is banked and safe.

2 A loss is booked?
Only the PnL of your investment goes down. Your other balances are untouched.

3 Profit comes back?
First it refills your PnL until it equals your investment. Anything extra goes to Secure Profit.

✓ Withdraw while PnL is positive

You receive your current PnL (for example $30) minus the early-withdrawal charge that applies.

⚠ Withdraw while PnL is zero or negative

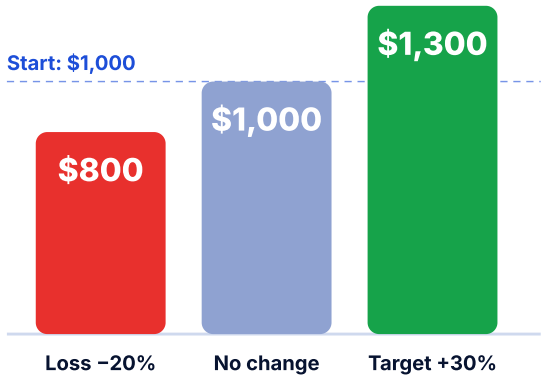

Nothing is returned from the investment and it closes. If you stay invested, later profits can rebuild it, but recovery is **not guaranteed**.

05 · IMPORTANT

Know the risks first.

Responsible investing starts with knowing your limits. **Only invest money you can afford to lose.**

What $1,000 could look like

Simple examples for illustration, before charges. They are not forecasts, and losses can exceed the −20% shown.

The 30%+ is a target, not a promise

We aim for it, but results may be lower, or negative. There is no fixed monthly or yearly return.

No regulation or protection

Primepip is not regulated, has no independent audit, and is not covered by any investor compensation scheme.

Crypto transfers cannot be undone

A payment sent to the wrong address or network may be lost for good. Always check before you send.

Earlier withdrawal charges apply

Minimum contract is 12 months. Withdrawing earlier costs 10% or 5% of the amount withdrawn.

Please read the Terms and Conditions and Privacy Policy on primepip.com before you fund your account. Do not invest money you need for living costs, debts or emergencies, and do not invest more than you are comfortable losing.

06 · GETTING STARTED

Start in five steps.

Registration is free. Funding and investing are separate steps, so you stay in control.

1

Register
Create your Primepip ID with name, email and password. Add a referral code if you have one.

2

Verify your ID
Complete your profile and upload a clear ID. The name must match. An admin reviews it.

3

Add funds
Send USDT (TRC20 or BEP20) or Binance transfer, then submit the amount, TxID and proof.

4

Invest
Once funds are credited, choose how much to invest: $100 to $1,000 at launch.

5

Track
Follow balances, statements and notifications in your dashboard.

Key numbers at a glance

$100 – $1,000
Investment range at launch

12 months
Minimum contract

$20
Minimum withdrawal

24 hours
Deposit approval, within working hours

No limit
Moving Secure Profit or referral earnings to your wallet

$0
Primepip deposit and withdrawal fees*

*Network or exchange fees charged by the blockchain or your exchange may still apply. Limits and times can change; always check the live information in your dashboard.

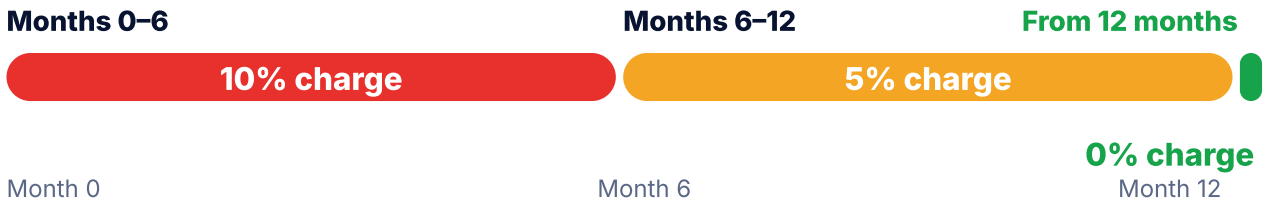

Always use the live payment instructions shown in your dashboard. Never reuse an old screenshot or an address sent to you by anyone else. A transfer on the wrong network may be impossible to recover.

07 · EXITING

Your exit options.

You can withdraw your investment at any time. The charge depends on how long you have been invested.

Early-withdrawal charge

The charge applies to the amount you withdraw. Your live withdrawal preview shows the exact charge before you confirm.

Example: $500 withdrawal

When	Charge	You receive
Before 6 months	$50	$450
6 to 12 months	$25	$475
From 12 months	$0	$500

Full or partial

Full withdrawal

You receive your current investment PnL (less the charge), plus your Secure Profit and referral earnings. If PnL is zero or negative, nothing is returned from the investment.

Partial withdrawal

Available when PnL is above $100. You must leave at least $100 invested. Example: $600 PnL allows up to $500.

Your own wallet
Paid within 24 working hours

Secure Profit and referral earnings move to your wallet with no limit. Payouts are processed manually by our admin team; you will see the TxID and proof in your activity. Check your wallet address and network carefully.

08 · REFERRALS (OPTIONAL)

Earn more when others join.

Referring is optional. You do not need to refer anyone to invest. If you do introduce Primepip to others, you can earn two rewards.

1. Bonus on investment

Every time your referral invests, you receive a percentage of that amount.

5%

launch rate · set by Primepip and may change

Example: referral invests $500 → you earn **$25**

2. Profit on investment

Every time profit is added, you earn a share based on your referrals' **combined** investment.

$100 + $400 = $500

The more your referrals have invested, the more you earn. If they reduce their investment, your share reduces.

A referral counts once they have completed all four steps

1. **Register** — using your referral ID or link
2. **Complete profile** — with their details
3. **Pass KYC** — identity approved
4. **Invest** — at least the minimum

Become an agent

Have more than 10 referrals? You can apply to become an agent. Agents earn the same two rewards and can send wallet funds to their direct referrals for deposits.

Share your card

Your referral link and QR code are in your dashboard under Referrals and in your Statement. Rewards are shown in your Referral earnings balance.

Referral rewards are not a fixed income. They depend on your referrals' investments and on the active referral policy, which can change.

09 · QUESTIONS AND NEXT STEP

Quick answers.

Is profit fixed or guaranteed?
No. 30%+ a year is a target, not a promise. Results can be lower, or negative.

Can I lose my money?
Yes. Only your invested amount is exposed to trading results, but it can fall a long way, and you can lose all of it.

Can I withdraw before 12 months?
Yes, fully or partially. The charge is 10% before month 6, 5% from month 6 to 12, and 0% after.

Do I have to refer people?
No. Referring is optional and only adds extra earning potential.

Is Primepip regulated?
No. It is an early-stage start-up and is not registered or regulated.

Ready to look closer?

Create your free Primepip ID, complete your profile and ID check, and read the terms before you decide. The minimum investment is $100.
